ARVANITIS
CONSTRUCTIONS

MARINE / YACHTING / STEEL & ALUMINIUM

# Engineering *beneath excellence.*

COMPANY PROFILE

Piraeus, Greece. Working internationally.

01 / THE COMPANY

# Extraordinary vessels.
# *Exceptional engineering.*

Arvanitis Constructions brings together marine engineering, shipbuilding, ship repair and heavy steel fabrication under one coordinated technical team.

Based in Piraeus, we undertake demanding projects in Greece and internationally. More than 10 years of experience spans the repair, conversion, construction and technical support of ocean-going and commercial vessels, luxury yachts and Mega Yachts.

Our experienced technical personnel combine plate fabrication, pipefitting, machining and specialised welding in carbon steel, stainless steel and aluminium. From a specific repair to a complete conversion programme, we focus on quality, reliability, safety and rapid response.

10+

YEARS OF EXPERIENCE

200+

REPAIRS & INTERVENTIONS

STRUCTURAL KNOWLEDGE. PRACTICAL EXPERIENCE.

02 / OUR EXPERTISE

# One partner.
# *Every critical detail.*

An integrated scope, from inspection and prefabrication to assembly, installation and final delivery.

01 ## Ship repair & conversion

General repairs, conversions, ballast tank construction and repair, and in-water interventions.

02 ## Yachts & new builds

Mega Yacht construction and conversion; steel and aluminium hulls, superstructures, structural and mechanical components.

03 ## Steel & aluminium fabrication

Plate fabrication, structural assembly, bespoke marine components and specialised aluminium applications.

04 ## Piping & mechanical works

Fabrication, installation, repair and replacement of all types of metal piping; mechanical installations and precision machining.

05 ## Welding & deck machinery

Specialised carbon steel, stainless steel and aluminium welding; repairs to cranes, winches and anchor windlasses.

06 ## Industrial construction & support

Heavy steel structures, large steel buildings, industrial facilities and canopies; inspections and immediate technical support in Greece and abroad.

03 / MEGA YACHTS & NEW BUILDS

# What you see is luxury.
# *We build its foundation.*

YACHT ENGINEERING / CONCEPT VISUAL

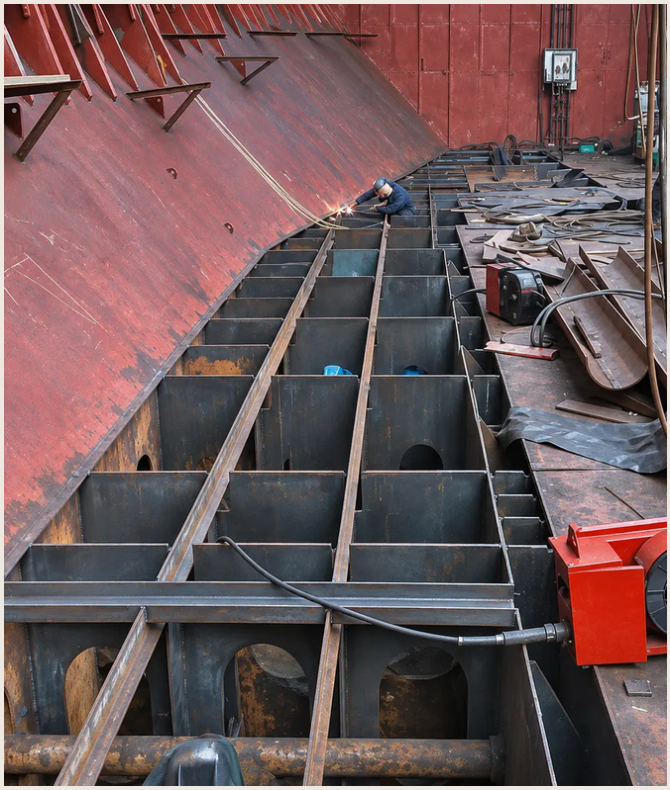

We participate in complete Mega Yacht construction and conversion projects, undertaking critical structural and mechanical elements of the build. Precision, workmanship and an impeccable final result guide every stage.

Hull and superstructure construction; foundations, decks and bulkheads; platforms, stairways and railings; high-precision plate fabrication; piping and mechanical installations; stainless steel and aluminium work; specialised welding, structural modifications and technical support throughout new-build and refit programmes.

04 / STEEL & ALUMINIUM HULLS

# Precision.
# *In every plate.*

HULLS / SUPERSTRUCTURES / STRUCTURAL COMPONENTS

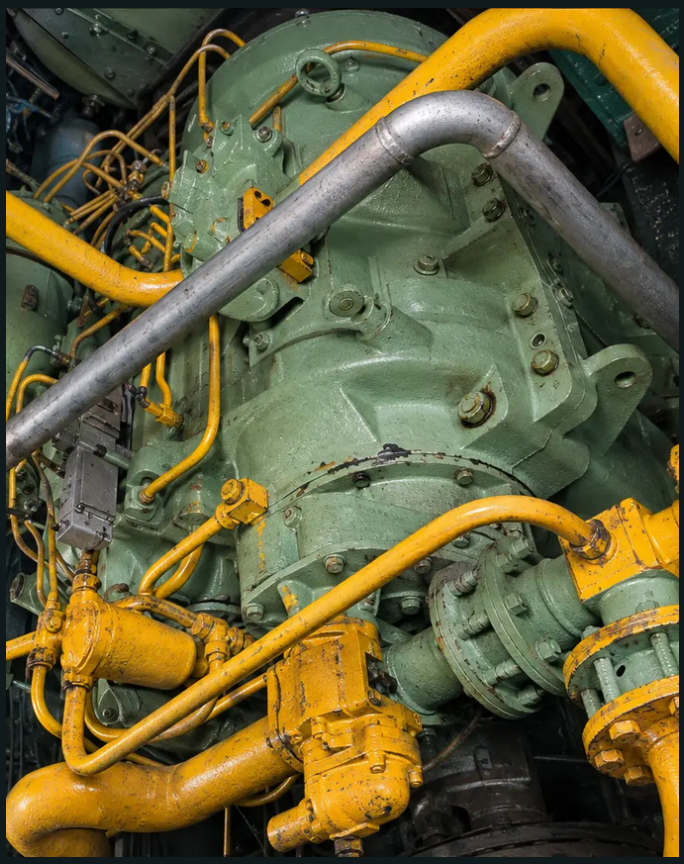

We construct and assemble steel and aluminium hulls and superstructures, together with the main and secondary structural elements of a vessel. Every component is fabricated to technical drawings, engineering studies and the requirements of the project.

Our scope includes plate renewal and fabrication, ballast tank construction and repairs, conversion work and structural modifications. Integrated prefabrication and assembly keep the work coordinated through installation and final delivery.

05 / PIPING & MECHANICAL SYSTEMS

# Complexity.
# *Working as one.*

Pipework is a discipline of accuracy. We fabricate, install, repair and replace metal piping, combining workshop preparation with experienced teams on board.

Steel and specialised piping, stainless steel and aluminium applications; bending, cutting, end preparation and fitting; mechanical installations and high-precision machining. Our teams also undertake technical repairs to cranes, winches and anchor windlasses.

FABRICATION / INSTALLATION / REPAIR / REPLACEMENT

06 / WELDING & WORKMANSHIP

# Strength in the joint.
*Care in the detail.*

Experienced, certified welders carry out demanding marine and structural work in carbon steel, stainless steel and aluminium. Our team combines steel fabricators, pipefitters and machinists to address both standard maintenance and complex technical projects.

Our equipment supports MIG/MAG, TIG and MMA welding processes, alongside the preparation, grinding, fabrication and machining operations required for precise execution. Safety, coordination and consistent workmanship remain central to every intervention.

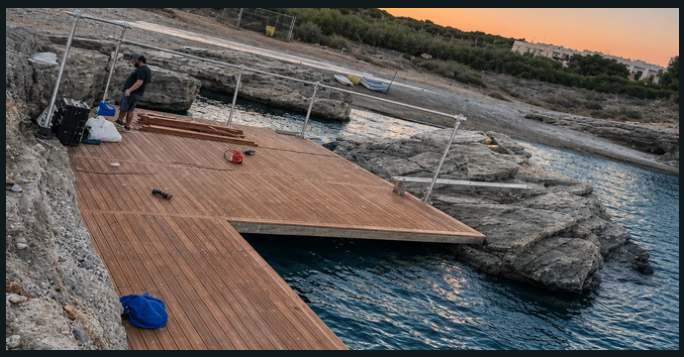

07 / SPECIAL FABRICATIONS

# Purpose-built.
# *Down to the last detail.*

Marine components and bespoke assemblies, developed around the vessel, its operating requirements and the project drawings.

YACHT HANDRAILS

FLOATING MARINAS / RAMPS

Our fabrication capabilities extend to yacht handrails, floating marina construction and ramp fabrications. Steel, stainless steel and aluminium are shaped and assembled for specialised marine applications.

The same technical disciplines support bespoke platforms, foundations, stairways, railings and the individual structural and mechanical components needed on board.

08 / BEYOND THE WATERLINE

# Marine precision. *Industrial scale.*

Our shipbuilding experience carries directly into land-based heavy steel construction, where welding quality, precision and structural strength are equally demanding.

- Large steel and industrial buildings
- Warehouses and logistics facilities
- Large-span steel canopies
- Heavy steel frames and bridges
- Platforms and steel foundations
- Industrial and specialised heavy-duty structures
- Bespoke construction to technical drawings and engineering studies

We undertake complex, large-scale projects with close control at each stage of production, applying the experience of marine fabrication to significant industrial and structural challenges.

09 / QUALITY & MATERIALS

# Quality runs *through everything.*

Quality and safety are fundamental to the way we work. Skilled personnel, appropriate materials and coordinated execution support demanding ship repair and construction projects.

01

## People

Experienced pipefitters, steel fabricators, machinists and certified welders hold the professional qualifications required for their work.

02

## Materials

Where required, major materials are supplied with relevant quality and conformity certificates issued by approved bodies and manufacturers.

03

## Traceability

Material documentation supports traceability and compliance with the requirements of each individual project.

MATERIAL SCOPE

Shipbuilding steel and aluminium plates / structural steel / marine-grade aluminium / steel pipes and specialised piping / stainless steel / welding materials, electrodes and consumables.

# Equipped for precision.
*Ready for the challenge.*

Our facilities in Piraeus combine modern machinery and tools with practical technical expertise. Continuous investment in equipment, technology and people supports precise, responsive work.

- Professional pipe bending machines
- Horizontal and rotary pipe-cutting machines
- Portable plasma cutting systems
- Grinding, preparation and pipe end-forming equipment
- Modern electric welding machines for MIG/MAG, TIG and MMA
- Steel fabrication and high-precision machining tools
- Equipment for aluminium and stainless steel fabrication and welding

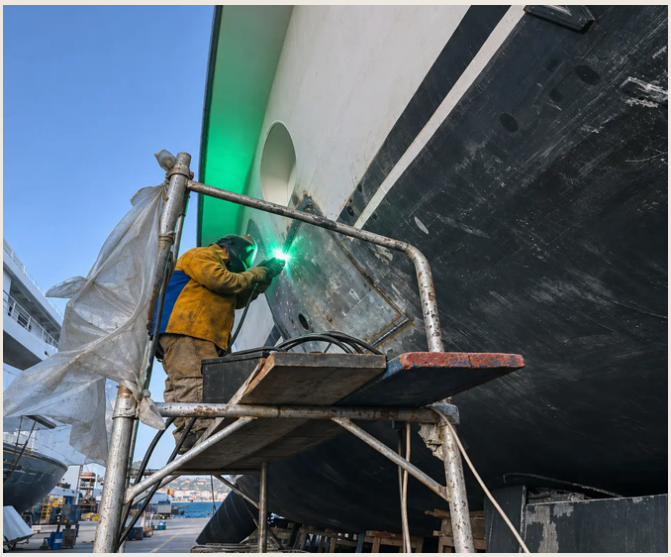

*Experienced teams. The right tools. Consistent workmanship.*

11 / WORK IN FOCUS

# Precision.
# *Put into practice.*

01 / MARINE STEEL FABRICATION

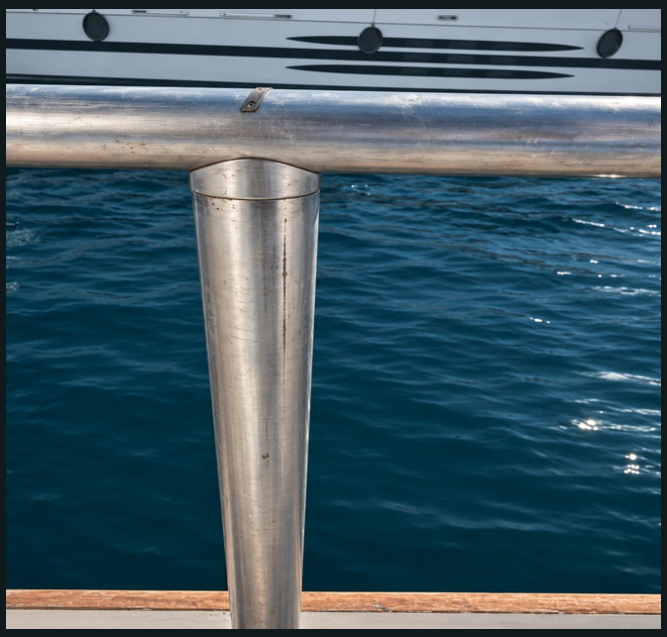

02 / HULL REPAIR & WELDING

03 / MARINE PIPING

12 / WORK IN DETAIL

# Every intervention.
# *A visible commitment.*

01 / STAINLESS STEEL DETAIL

02 / YACHT HANDRAIL FABRICATION

03 / FLOATING MARINA CONSTRUCTION

04 / RAMP FABRICATION

13 / CONNECTIONS & REACH

# Piraeus roots.
# *International reach.*

We work with shipping companies, technical offices, ship managers, shipyards and construction organisations in Greece and abroad. Specialised teams can mobilise to the port, yard or project site required by the client.

PARTNERSHIPS TO DATE INCLUDE

| | |
|---|---|
| Oceangold Tankers | Tsakos Shipping & Trading |
| Navitramp | Queensway |
| Velos Tankers | Golden Yachts |

SHIPYARDS & REPAIR FACILITIES

*Perama / Salamina / Chalkida / Elefsina / Syros*

THE SECTORS WE SERVE

Tankers / bulk carriers / container ships / passenger vessels / cruise ships / commercial vessels / luxury yachts / Mega Yachts / new-build programmes / industrial and large-scale steel and aluminium construction.

*Immediate technical support. In Greece and internationally.*

# Experience. Precision. *Reliability.*

Our vision is to be a stable, reliable technical and construction partner for the international marine, yachting and industrial markets. We aim to provide immediate, effective solutions, whatever the size, category or complexity of the challenge.

Every project is a new challenge. Every partnership is built through quality, consistency and results.
